

Who we are and what we do

TTTech Industrial aspires to unlock the incredible potential of industrial automation. It combines transformative technologies with hands-on experience in critical real-time systems to offer customers flexibility, reliability and choice. TTTech Industrial works with its customers to achieve their goals of smarter automation, better data access and more flexible manufacturing with industrial IoT solutions.

Beyond the manufacturing market, TTTech Industrial also offers robust and reliable communication for the energy sector, applicable in substation automation and energy management.

With product platforms that combine traditional automation functionality with secure access to IT services and deterministic connectivity, TTTech Industrial delivers simple and effective ways to bring IoT to industrial systems.

TTTech Industrial operates under the umbrella of TTTech Group, a leading provider of safe networked computing platforms, with cross-industry experience from more than 20 years of operation.

Shaping the future of open and autonomous industry

TTTech Industrial integrates open, standard technologies to offer flexible platforms for connecting, controlling and managing machines.

Nerve is an industrial edge computing platform that delivers flexibility and openness. Nerve products provide a software infrastructure for the plant floor and the cloud that enables users to access data, manage devices and deploy applications remotely.

TTTech Industrial ↘

Founded	2019
Headquarters	Vienna, Austria
Employees	65 (30 TTTech Industrial, 35 associated in TTTech Group)
Members of the executive board	Thomas Berndorfer, Artur Gruner, Herbert Hufnagl
Gross performance 2021	12 Millionen Euro
Markets	Manufacturing, energy
Global presences	Austria, USA, Japan

TTTech Industrial Offering ↘

Industrial control platforms and real-time networks

Industrial IoT

Nerve: industrial
edge computing platform

TTTech Industrial and Group offices ↘
