

# TSN Starter Package

Everything needed to build, configure and evaluate TSN networks

## INCLUDES

- ✓ Evaluation Board (4-port stand-alone switch board)
- ✓ Edge IP Solution (2+1/4+1 port TSN IP Solution)
- ✓ Reference Design (precompiled Edge IP Solution image to enable as 4+1 port TSN switch)
- ✓ Slate XNS (TSN network configuration software with GUI)

TTTech Industrial's Slate product line provides all the elements required for building, configuring and evaluating TSN networks. The TSN Starter Package contains an Evaluation Board that can be used to implement bespoke configurations of Edge IP Solution on FPGA. The board can also be used as a 4+1 port switch to build TSN networks that are configurable using Slate XNS software. Further devices (from any TSN standards compliant vendor) can be added to this network and configured by Slate XNS.

The TSN Starter Package is offered in three variants, designed to suit every evaluation project. Longer term projects can benefit from permanent licenses for the Edge IP Solution reference design and Slate XNS configuration software, enabling continued use of the Evaluation Boards as switches in TSN test networks.

### 6 Months Evaluation

€ 6,000

- 1 Evaluation Board
- 6 months evaluation license for Edge IP Solution
- 6 months evaluation license for Slate XNS (up to 5 nodes)
- 6 months license for Reference Design (4+1 port TSN switch or switched endpoint)
- 5 hours standard support

### 12 Months Evaluation

€ 12,000

- 2 Evaluation Boards
- 12 months evaluation license for Edge IP Solution
- Permanent license for Slate XNS (up to 5 nodes)\*
- Permanent license for Reference Design (4+1 port TSN switch or switched endpoint)\*
- 5 hours standard support

### 24 Months Prototyping

€ 24,000

- 2 Evaluation Boards
- 24 months prototyping license for Edge IP Solution\*\*
- Permanent license for Slate XNS (up to 5 nodes)\*
- Permanent license for Reference Design (4+1 port TSN switch)\*
- 5 hours standard support

\* After the evaluation period, the latest versions of Slate XNS (up to 5 nodes) and Reference Design (4+1 port TSN switch) are issued for permanent use (not for production use). Ongoing upgrade/update service available for 3,200 € per year.  
\*\* Prototyping license offers full compilation functionality (not for production use).
