Who we are and what we do

TTTech Industrial aspires to unlock the incredible potential of industrial automation. It combines transformative technologies with hands-on experience in critical real-time systems to offer customers flexibility, reliability and choice. TTTech Industrial works with its customers to achieve their goals of smarter automation, better data access and more flexible manufacturing with industrial IoT solutions. Beyond the manufacturing market, TTTech Industrial also offers robust and reliable communication for the energy sector, applicable in substation automation and energy management. With product platforms that combine traditional automation functionality with secure access to IT services and deterministic connectivity, TTTech Industrial delivers simple and effective ways to bring IoT to industrial systems.

TTTech Industrial operates under the umbrella of TTTech Group, a leading provider of safe networked computing platforms, with cross-industry experience from more than 20 years of operation.

TTTech Industrial	
Founded	2019
Headquarters	Vienna, Austria
Employees	85+
Members of the executive board	Wolfgang Leindecker Dr. Thomas Berndorfer Artur Gruner
Gross performance 2020	13 million Euros
Markets	Manufacturing, energy
Global presences	Austria, Finland, USA, China, Japan

Shaping the future of open and autonomous industry

TTTech Industrial integrates open, standard technologies to offer flexible platforms for connecting, controlling and managing machines with its product lines Nerve, Slate and Flexibilis.

Nerve is an industrial edge computing platform that delivers flexibility and openness. Nerve products provide a software infrastructure for the plant floor and the cloud that enables users to access data, manage devices and deploy applications remotely.

Slate is a deterministic networking platform that provides comprehensive TSN solutions. Slate products include TSN Device Solutions, TSN Network Solutions and TSN Network Software, which enable users to quickly integrate TSN features and easily build TSN networks.

Flexibilis is a redundant networking product portfolio that offers precision and reliability. Flexibilis products include FPGA IP cores and software that deliver high-availability seamless redundancy for a wide range of industrial applications, most notably in the energy industry.

Offering

Industrial control platforms and real-time networks		
Industrial IoT	**Deterministic Networking**	**Redundant Networking**
Nerve: industrial edge computing platform	Slate: comprehensive OPC UA over TSN solution	Flexibilis: field-proven HSR/PRP solutions
